

Laboratoire Léon Brillouin

The French Neutron Source

Call for contributions to the annual report 2012

Every year, the annual report of the Laboratoire Léon Brillouin (LLB) illustrates the richness and excellence of the research performed with our instruments.

For the 2012 edition, we invite our users to contribute to this report by proposing highlights on their:

- original scientific results,
- new methodological developments
- major instrumental achievement

The selected reports will address scientists of all the neutron scattering communities and also non-specialized public, curious to discover our research. Therefore, the texts submitted should be accessible to non-experts.

Guidelines for submitting highlights

You are invited to send short abstracts to reports.LLB@cea.fr by **January 7th**.

The text length should be approximately 100 words.

Optional illustrating pictures or graphs (jpg, bmp) are welcome, but should be provided as separate files with a minimal resolution of 250 dpi. Their captions would be given in a separate file.

After the acceptance of the abstract by **January 21st**, you would hand in the full article. The approximate length would be two pages (font 11, single interline, ~600 words), including graphics and references. You should provide at least one graphic illustration of your results and up to three ones, showing the instrumental setup or diagrams. For help, a template Word document would be provided in order to appreciate the final appearance of your article.

The deadline for the submission of articles will be **February 25th 2013**.

Email address for the submission of highlights and information: reports.LLB@cea.fr
