

Workshop Or-Nano

Chirality and gold nanostructures

Paris, le 8 juin 2022

Chirality and gold nanostructures

This workshop is for the Or-nano community and everyone interested in chirality in plasmonic nanostructures. It aims to present a state of the art on this fascinating field, in full expansion in recent years and located at the interface of several disciplines. Questions about the synthesis of objects, the measurements of their optical response, the underlying physical concepts, the different properties of these new materials will be the subject of presentations and discussions.

Organisation of the day:

4 presentations from specialists:

- Jeanne Crassous (Univ. Rennes, CNRS, ISCR, France)
- Luis Liz-Marzán (CIC BiomaGUNE, Donostia-San Sebastian, Spain)
- Stéphane Parola (Université de Lyon 1, ENS Lyon, CNRS, France)
- Bruno Gallas (INSP, Sorbonne Université, CNRS)

and flash presentations:

- Submit an abstract before the **15th of May** to fabienne.testard@cea.fr and claire.mangeney@u-paris.fr

Inscription are free but mandatory at <http://or-nano.insp.upmc.fr/inscriptions.html>

Important dates:

- Inscription opens: the 20th of April 2022
- End of inscription: the 24th of May 2022
- Limit for Abstract submission: the 15th of May 2022
- **Conference day** : The **8th of June 2022** from 9H00 to 17H00 sur le Campus St Germain de l'Université Paris-Cité
